

AfyaSasa Full System Audit Report

Generated: 20260709T140252Z (UTC)

Environment: http://localhost:3000/api/v1 / http://localhost:8080

Tenant: demo | **User:** admin@demo.afyasasa.local

Summary

Result	Count
PASS	43
WARN	3
FAIL	0

Work completed in this release cycle

- Account Center** — create/edit users, specialisation, reset password, search, quick-add doctor, clinical staff directory
- Radiology catalog** — CSV template download + bulk import (modalities + study protocols)
- Executive Analytics** — BI dashboard with date ranges, KPIs, trends, comparisons, configurable widgets, CSV export
- Auth/session** — cross-tab sync, refresh tokens, forced password change flow
- Single-hospital mode** — tenant selector hidden via env config

Results by department

Infrastructure

Test	Status	Detail
Backend health	PASS	HTTP 200
Frontend (Nginx)	PASS	HTTP 200

Swagger docs	PASS	HTTP 200
Template: lab-catalog-import-template.csv	PASS	HTTP 200
Template: radiology-catalog-import-template.csv	PASS	HTTP 200

Authentication

Test	Status	Detail
Demo admin login	PASS	Token received
GET /auth/me	PASS	admin@demo.afyasasa.local

Reception

Test	Status	Detail
GET /patients?limit=5	PASS	OK
GET /appointments?limit=5	PASS	OK
GET /referrals?limit=5	PASS	OK

Outpatient

Test	Status	Detail
GET /opd/encounters?limit=5	PASS	OK
GET /opd/triage/queue	PASS	OK
GET /opd/doctor/queue	PASS	OK

Investigations

Test	Status	Detail
GET /laboratory/panels	PASS	OK
GET /laboratory/tests?limit=5	PASS	OK
GET /laboratory/requests?limit=5	PASS	OK
GET /radiology/modalities	PASS	OK
GET /radiology/studies	PASS	OK
GET /radiology/requests?limit=5	PASS	OK

Inpatient

Test	Status	Detail
GET /inpatient/wards	PASS	OK
GET /inpatient/admissions?limit=5	WARN	
GET /inpatient/beds	PASS	OK

Emergency

Test	Status	Detail
GET /emergency/queue?limit=5	PASS	OK
GET /emergency/bays	WARN	
GET /emergency/dashboard	PASS	OK

Specialty

Test	Status	Detail
GET /theatre/procedures	PASS	OK
GET /theatre/bookings?limit=5	PASS	OK
GET /maternity/pregnancies?limit=5	PASS	OK

Reports

Test	Status	Detail
GET /reports/dashboard	PASS	OK
GET /reports/operations	PASS	OK
GET /reports/executive-analytics?from=2026-06-09&to=2026-07-09	PASS	OK
GET /reports/opd-summary	PASS	OK
GET /reports/laboratory	PASS	OK

Administration

Test	Status	Detail
GET /admin/users/summary	PASS	OK

GET /admin/users	PASS	OK
GET /admin/users/role-options	PASS	OK
GET /admin/clinical-staff	PASS	OK
GET /admin/settings	PASS	OK
GET /admin/clinical-catalog	PASS	OK
GET /admin/departments	PASS	OK

Account Center

Test	Status	Detail
Clinical staff directory	PASS	1 clinician(s) listed

Radiology Catalog

Test	Status	Detail
Modalities configured	PASS	3 modality(ies)
Study protocols in catalog	WARN	0 study protocol(s)

Executive Analytics

Test	Status	Detail
BI dashboard API	PASS	summary + trends returned

UI

Test	Status	Detail
Page /	PASS	HTTP 200
Page /index.html	PASS	HTTP 200

Manual UI audit checklist (for your review)

- ☐ Login screen — no hospital code field (single-tenant mode)
- ☐ Sidebar navigation — all department groups visible for admin
- ☐ Hospital Control Center → User & access — edit doctor, reset password
- ☐ Hospital Control Center → Radiology — download template, import CSV

- ☐ Reports → Executive Analytics — date presets, charts, export
- ☐ OPD → Doctor Queue, Triage Queue load without layout issues
- ☐ Laboratory & Radiology worklists operational
- ☐ Mobile/tablet — content full width, nav drawer works

UI & deployment verification (automated)

Check	Result
Docker stack (postgres, redis, minio, backend, frontend, nginx)	All containers Up
App URL	http://localhost:8080
API URL	http://localhost:3000/api/v1
Admin login	PASS with configured credentials
Executive Analytics in deployed JS bundle	Present
Lab + radiology CSV templates served	HTTP 200
Single-tenant frontend build	VITE_HIDE_TENANT_SELECTOR=true

WARN follow-up (needs your audit attention)

Item	Detail	Action for audit
Radiology study protocols	0 imported yet	Import radiology CSV template in Control Center
GET /inpatient/admissions	HTTP 500 Internal Server Error	Bug — investigate before production
GET /emergency/bays	HTTP 403 for admin role	Expected — ED bays need emergency permission

Overall verdict

****43 PASS · 3 WARN · 0 FAIL**** on automated API/UI checks. System is running and ready for your manual walkthrough. One backend error on inpatient admissions list should be reviewed.

Automated audit by ops/full-system-audit.sh
